FireWall

NuVox is leading the industry with an innovative firewall product that brings the latest in network protection to your business through stateful, customer-administered technology. With FireWall, NuVox provides you with the tools you need to easily administer and defend your network without additional IT support and hardware costs.

Features and Advantages of FireWall

Network Security. If you have dedicated Internet access, your intellectual property is vulnerable to attack 24x7. FireWall reduces your business' risk from:

- ▶ **Intellectual Property Theft.** Safeguard your financial and payroll information or business plans.
- ▶ **Non-Approved Website Access.** With Content Filtering, restrict access to non-work-related sites.

Reporting. With FireWall reports, you can easily monitor bandwidth utilization, employee activity, external threats, virus activity, etc.

- ▶ **Firewall Management.** Basic reporting offers you the tools to monitor outbound bandwidth usage, employee activity online and content filter violations.
- ▶ **Administrative Reporting.** Enhanced reporting provides data based on specific functional areas such as Security Administration, Internet Administration, Email Administration, and Network Administration.

Convenience. With FireWall, you receive an advanced, cost-effective network security product with the additional convenience of:

- ▶ **Web Portal.** Serves as your single point of reference for all of your administrative and reporting needs.
- ▶ **Online Administration.** Gives you the ability to quickly make changes to your FireWall and content filtering configurations.
- ▶ **Email Notifications.** Receive weekly or monthly email reminders to log in to the web portal to generate your reports.
