LONG DISTANCE SERVICES

NuVox provides a complete selection of long distance services, making it easy for you to connect with clients and business partners around the world.

Features and Advantages of Long Distance

Domestic and International Long Distance. NuVox offers competitive rates for calls made within the United States and access to more than 300 countries worldwide through our affordable International calling plans.

Rollover Minutes. NuVox provides your business with the ability to rollover unused free long distance minutes and additional long distance buckets of minutes. Your unused minutes will rollover for three months!*

Account Codes. Customers can track local and long distance calls by caller, department or client using our advanced Account Code system. This allows our customers to review calling records easily and charge back costs to specific departments or clients. We offer both Verified Account Codes and Non-Verified Account Codes. Both types allow you to match telephone usage charges to particular users or projects, as well as control chargeable calls.

Toll-Free 8xx Service. NuVox provides toll-free service at some of the most competitive rates in the industry. Toll-free service is an easy and convenient way for your customers to contact you at no charge to them.

Toll-Free 8xx Enhanced Features. Available at an additional charge, 8xx services include holiday, time of day, and geographical routing; payphone and non-payphone call blocking; and directory assistance listing.

To learn more about how your business can enjoy the ease and flexibility of our Long Distance Services, contact your NuVox Representative.

*Available with FLEXlinx and VoxIP.
